### How Housing Assignments Are Made

We believe it’s important to share how the housing assignment process works, especially if you are wondering why you may not have been assigned to the top building and/or room type in your preference list. The main component of the assignment process involves availability versus demand. As an example, there are some specific buildings and room types that are incredibly popular and are listed as the top choice on many preference lists. While we wish we could assign every student and their roommate/s to their #1 room preference, many times there are not enough actual rooms to assign every student their first choice.

If a student’s first preferred building/room is not available, rooms are then assigned based on availability (continuing to factor in building/room and roommate groups) and incorporating the other preferences/choices on one’s list. If there is no availability based on the initial listed preferences, a student and their roommate group may be randomly assigned a room based on the class year of the roommate group’s leader, building availability, and size of the roommate group.

If you and your group were not assigned to one of your most preferred room types, it was because the room type was more popular than we had spaces for and the random selection from there didn’t work out in your favor.

*Now that you have your assignment for 2022-2023, we realize that some of you may want to try to make changes/adjustments to get into a different building, room type, or even switch roommates. Below, get a sneak peak on how to participate in the “Room Swap: Coming In July” section.*

### Room Swap: Coming In July

Even though you have just received your room assignment, we also know you may want to make a change to your living situation before the fall. While that is understandable, please note that we are unable to make any changes to your assignment at this time.

Your opportunity to change rooms, if desired, will come later this summer. Throughout all of July, we will have a [Room Swap](#) period open to all fall residents who hope to move to a different space for next year. Room Swap involves an individual student indicating an interest in swapping rooms. After indicating that interest in the portal, you would be able to search for others that have also expressed interest in swapping rooms. If a mutual match occurs, we’ll swap your housing assignments!

Stay tuned for more information to come on Room Swap on July 1.
